

SABA Activator 9400

bonding promotor

Description

SABA Activator 9400 is a 1-component bonding promotor for pre-treating and cleaning of various surfaces.

Field of application

The marine, transport, building and industry sectors. SABA Activator 9400 is very suitable as a bonding promotor for the pre-treatment of porous and non-porous surfaces, metals and plastics.

Advantages

- fast drying time
- free of isocyanates
- no spot or stain formation
- clean and activate in one action (with slight pollution)

Method of use

If there is extensive pollution, the substrates should be cleaned in advance with SABA Cleaner 48.

For further instructions for use, see the relevant info sheets on www.saba.nl

Close the packaging as soon as possible after use; this has a positive effect on the processing properties and the shelf life of the product.

Technical data

Basis	silan
Viscosity at 23 °C (EN 12092)	approx. 10 mPa.s
Density (EN ISO 2811-2)	approx. 820 kg/m ³
Solids content	approx. 1 %
Flashpoint	approx. + 12 °C
Solvents	mixture of alcohols
Open time	10 minutes to 24 hours
Coverage	approx. 100 g/m ²
Working temperature	min. + 5 °C to max. + 35 °C
Storage temperature	min. + 5 °C to max. + 35 °C
Temperature resistance	min. - 40 °C to max. + 120 °C

Order information

Packaging	can with resealable lid
Contents	1 litre (contains 12 items)
Colour	transparent
Article no.	100326 DIVV
Shelf life	12 months (in unopened packaging)

Other packaging on request. The shelf life may vary for large packaging.

Safety recommendations

For more information about safety, see the relevant SABA safety data sheet.
